V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. statement

Novelty (N)

Claims 1-17, 38-47, 49-60 YES

Claims 18-37, 48, 61-71 NO

Inventive Step (IS)

Claims 1-17, 38-47, 49-60 YES

Claims 18-37, 48, 61-71 NO

Industrial Applicability (IA)

Claims 1-71 YES

Claims NONE NO

2. citations and explanations (Rule 70.7)

Claims 18-37, 48 and 61-71 lack novelty under PCT Article 35(2) as being anticipated by Hendricks et al. (WO 95 15649). Considering claim 18, Hendricks discloses a method for delivering electronic books in an electronic book delivery system comprising:

- a) storing main sections of electronic books (index or titles stored at the library 262 as disclosed throughout the reference including but not limited to pages 18-19 and figure 10), wherein the index of a book inherently comprises one or more pages of content;
- b) receiving a request for a main section of an electronic book (figure 10, step 700);
- c) locating the requested main section (figure 10, step 708); and
- d) providing the located main section (figure 10, step 712).

However, Hendricks fails to specifically disclose that the main section comprises one or more pages of content from a corresponding electronic book as recited in the claim.

It is notoriously well known in the art that the index of a book typically comprises one or more pages of plural pages

Claims 19-27 are met by figure 10 and pages 18-19, wherein the auxiliary sections are the pages of a book.

Considering claims 28, 48 and 61, Hendricks discloses a method for delivering electronic books in an electronic book delivery system comprising:

- a) storing first sections (index or titles) at the library (262) or at the operations center (250) as disclosed throughout the reference including but not limited to pages 18-19 and figure 10), wherein the index of a book inherently comprises one or more pages of content;
- b) storing second sections (pages of the book) at the library (262) or at the operations center (250) as disclosed throughout the reference including but not limited to pages 18-19 and figure 10);
- c) receiving a request for an electronic book (figure 10, step (Continued on Supplemental Sheet.)

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued):

716);
d) retrieving a second section (i.e. the pages of the book); and
e) providing the located main section (figure 10, step 720).

Claims 29-37 and 62-70 are met by figures 1-10.

Claim 71 lacks an inventive step under PCT Article 33(3) as being obvious over Hendricks.

Considering claim 71, Hendricks discloses all the claimed subject matter above, except for the Internet Web site as recited in the claim.

It is notoriously well known in the art that the Internet is the most widely used source of information.

Therefore, it would have been obvious to one of ordinary skill in the art to modify Hendricks' system to include an Internet Web site because the Internet is the most widely used source for obtaining information.

Claims 1-17, 38-47 and 49-60 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a method and corresponding apparatus for distributing electronic books to subscribers comprising storing electronic books, receiving book orders, determining a queue location, placing first and second sections in first and second queues or receiving electronic books, placing or more books in a plurality of queues and emptying the queues in accordance with a priority model as recited in the claims.
